

Made Tough Since 1936

NORMALISED MASONS CLUB HAMMER

FEATURES

- Used for general purpose work, light demolition and work in confined spaces
- Can be used with chisels for cutting stone & metal
- Head is forged then normalised for a softer face (below 20HRC) that will mushroom, for applications where risk of chipping needs to be minimised
- Hammer head is pinned through the steel core of the fibreglass handle for added safety
- Includes tether hole for working at heights
