

*Made Tough Since 1936*

## NORMALISED GYMPIE HAMMER

### FEATURES

- Ⓜ Ideal for mining and drilling work in confined spaces
- Ⓜ Heavy head with short handle for maximum impact
- Ⓜ Head is forged then normalised for a softer face (below 20HRC) that will mushroom, for applications where risk of chipping needs to be minimised
- Ⓜ Hammer head is pinned through the steel core of the fibreglass handle for added safety
- Ⓜ Includes tether hole for working at heights
